

GCSE Preparation Schedule for Year 10 Students

SEPTEMBER

- Focus on getting to know the GCSE curriculum for each of your subjects.
- Create a study timetable and set achievable goals.
- Organise study materials and create a conducive environment for learning.

OCTOBER

- Review class notes regularly to consolidate learning.
- Identify areas of strength and weakness in each subject.
- Start creating a revision plan to guide your study sessions.

NOVEMBER

- Dedicate specific study sessions to tackle difficult topics.
- Participate actively in class and seek additional help if needed.
- Utilise past GCSE papers for practice on covered topics.

DECEMBER

- Assess your progress in different subjects.
- Update your study plan based on your performance.
- Enjoy the winter break but maintain a consistent study routine.

JANUARY

- Integrate feedback from last term's performance into your study plan.
- Enhance study sessions with additional resources.
- Form study groups for collaborative learning and different perspectives.

FEBRUARY

- Increase the intensity and frequency of revision sessions.
- Practice time management by answering questions under timed conditions.
- Continue working through past GCSE papers for varied subjects.

MARCH

- Revise all topics covered to date.
- Take practice exams to get accustomed to the format and timing.
- Review and understand the marking scheme and examiners' reports.

APRIL

- Treat mocks as a final practice under exam conditions.
- Analyse your performance to identify areas for further improvement.
- Discuss mock results with teachers to get targeted advice.

MAY

- Develop a targeted revision plan for weak subjects or topics.
- Seek additional help or resources if necessary.
- Continue regular practice with past papers and exam-style questions.

JUNE

- Review the year's work and ensure understanding of all key concepts.
- Plan your revision schedule for Year 11.
- Use the summer break to get ahead on topics to be covered next year.

JULY & AUGUST

- Engage in light but consistent study.
- Begin reading and familiarising yourself with Year 11 topics.
- Rest and recharge for a fresh start in Year 11.
- Consider joining summer school, where dedicated classes are available to either bridge learning gaps or give you a head start for Year 11.
