$$f(x) = \frac{1}{\sqrt{4x^2 + 9}}$$

- (a) Using a substitution, that should be stated clearly, show that

$$S = \sin \theta + \frac{1}{2} \sin 5\theta + \frac{1}{4} \sin 9\theta + \frac{1}{8} \sin 13\theta + \dots$$

5. An engineer is investigating the motion of a sprung diving board at a swimming pool.  
 Let  $E$  be the position of the end of the diving board when it is at rest in its equilibrium position and when there is no diver standing on the diving board.  
 A diver jumps from the diving board.  
 The vertical displacement,  $h$  cm, of the end of the diving board above  $E$  is modelled by the differential equation

$$4 \frac{d^2h}{dt^2} + 4 \frac{dh}{dt} + 37h = 0$$

where  $t$  seconds is the time after the diver jumps.

- (a) Find a general solution of the differential equation.

(2)

When  $t = 0$ , the end of the diving board is 20 cm below  $E$  and is moving upwards with a speed of 55 cm s<sup>-1</sup>.

- (b) Find, according to the model, the maximum vertical displacement of the end of the diving board above  $E$ .

(8)

- (c) Comment on the suitability of the model for large values of  $t$ .

8.

Figure 1

Figure 2

Figure 1 shows the central vertical cross section  $ABCD$  of a paddling pool that has a circular horizontal cross section. Measurements of the diameters of the top and bottom of the paddling pool have been taken in order to estimate the volume of water that the paddling pool can contain.

Using these measurements, the curve  $BD$  is modelled by the equation

$$y = \ln(3.6x - k) \quad 1 \leqslant x \leqslant 1.18$$

as shown in Figure 2.

(a) Find the value of  $k$ .

(1)

(b) Find the depth of the paddling pool according to this model.

(2)

The pool is being filled with water from a tap.

(c) Find, in terms of  $h$ , the volume of water in the pool when the pool is filled to a depth of  $h$  m.

(5)

Given that the pool is being filled at a constant rate of 15 litres every minute,

(d) find, in  $\text{cm h}^{-1}$ , the rate at which the water level is rising in the pool when the depth of the water is 0.2 m.
